

true_type

```
graph BT; A[nlohmann::detail::is_json_ref< json_ref< T > >] --> B[true_type];
```

The diagram illustrates an inheritance relationship. At the bottom is a box representing the base class `nlohmann::detail::is_json_ref< json_ref< T > >`. It has a light gray background and a black border, divided into three horizontal sections. The top section contains the class name. Above it is a box representing the derived class `true_type`. It has a white background and a gray border, also divided into three horizontal sections. The top section contains the class name. A blue arrow with a hollow triangular head points from the top of the base class box to the bottom of the derived class box, indicating that `true_type` inherits from `nlohmann::detail::is_json_ref< json_ref< T > >`.

nlohmann::detail::is
_json_ref< json_ref< T > >
